

GRACEY CURETTES

GRACEY CURETTE

UPPER JAW / ARCATA SUPERIORE

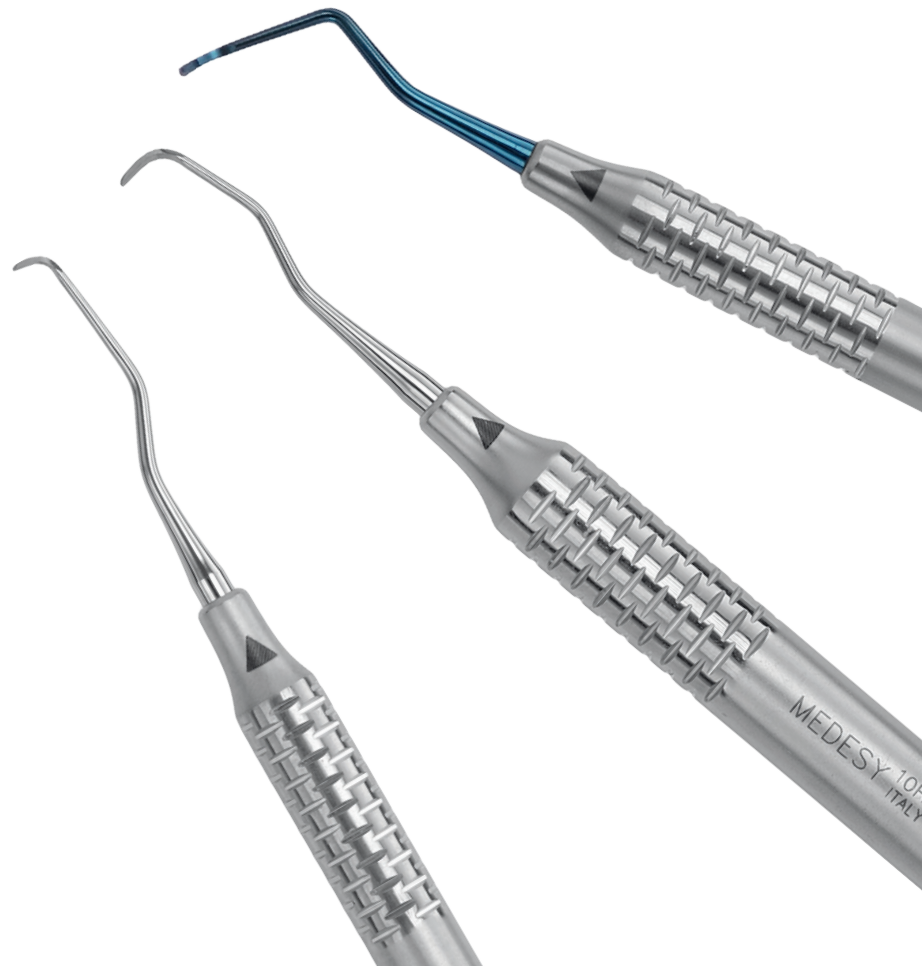

LOWER JAW / ARCATA INFERIORE

Medesy is glad to introduce the new line of curettes. The Gracey's family is now complete with the addition of the "Rigid type", useful in case of heavy calculus, that are usually removed with heavy scalers. New curettes "Titanium" are also available for specific fields, such as implantology. All lines are offered in 8 mm or 10 mm, according to your preferences.

Medesy è lieta di presentare la nuova linea di curettes. La famiglia Gracey è ora completa con l'introduzione del "Tipo rigido", utile in caso di rimozione calcoli, normalmente effettuato da scalers più pesanti. Sono disponibili ora le nuove curettes con punta al titanio, indirizzate ad utilizzi specifici, quali interventi all'implantologia. La linea è offerta sia in manico 8 mm che 10 mm, in funzione alle preferenze.

“MEDESYS IN SPOT

Medesy curettes are now available with new 10 mm diameter handle. In dentistry this helps to solve problems as carpal tunnel inflammation, caused most of the times from a reduced diameter of instruments.

Le curette Medesy sono da ora disponibili nel nuovo diametro 10 mm. Questo aiuta a risolvere problemi quali l'infiammazione del tunnel carpale, causato nella maggioranza dei casi da un ridotto diametro dello strumento.”

GRACEY CURETTES "RIGID TYPE"

Curette with thicker and less flexible stem, than usual Gracey.
Can be used for heavy calculus instead of traditional heavy scalers.

GRACEY CURETTES "LONG TYPE"

Curette with a long terminal stem, it is ~3 mm longer than usual. The extra length enables the operator to intervene at the bottom of deep periodontal pockets.

GRACEY CURETTES "SHORT TYPE"

Curette with the same characteristics as the "Long Type" except for the fact that its cutting tip is smaller, which enables the operator to intervene in periodontal pockets that are deep, yet narrow.

GRACEY CURETTES "TIPO RIGIDO"

Curette con gambo più grosso e meno flessibile, rispetto la Gracey tradizionale.
Utili in operazioni impegnative, che abitualmente richiedono l'utilizzo di grossi scalers.

GRACEY CURETTES "TIPO LUNGO"

Curette con il gambo terminale dello strumento ~3 mm più lungo della norma per poter intervenire in profondità nelle tasche parodontali profonde.

GRACEY CURETTES "TIPO CORTO"

Questa curette ha le stesse caratteristiche della "Long Type" con la differenza di avere la parte tagliente terminale più piccola al fine di poter intervenire convenientemente nelle tasche parodontali profonde ma strette.

“MEDESY IN SPOT

“UNIVERSAL CURETTES” and “SCALERS”, can be requested in 8 mm hollow handle.
Just write “8HL” before the code (ex: 639/23 = 8HL639/23).

“CURETTE UNIVERSALI” e “SCALERS”, possono essere richiesti con manico vuoto da 8 mm.
Aggiungere la dicitura “8HL” prima del codice (es: 639/23 = 8HL639/23). ”
